Technical drawing of a 1/4 scale model of a vertical structure. The drawing shows a cross-section with dimensions: 165mm, 149mm, 76mm, 32mm, 150mm, 75mm, and 380mm. The structure consists of a central vertical element with a flared top, surrounded by a grid-like material, all within a larger rectangular frame.

Figure 1 shows three types of test specimens. (a) is a rectangular specimen with a width of 110 mm and a height of 165 mm. It features a grid pattern and diagonal reinforcement. The height is divided into three sections: 149 mm for the main body, 76 mm for the top flange, and 16 mm for the bottom flange. The bottom flange has a width of 64 mm. (b) is a rectangular specimen with a width of 110 mm and a height of 165 mm. It features a grid pattern and diagonal reinforcement. The bottom flange has a width of 64 mm. (c) is a rectangular specimen with a width of 110 mm and a height of 165 mm. It features a grid pattern and diagonal reinforcement. The bottom flange has a width of 64 mm. A circular specimen with a diameter of 110 mm and a height of 165 mm is also shown, featuring a grid pattern and diagonal reinforcement. The bottom flange has a width of 64 mm.
